FAQ

WHAT IS MED PEDS?

Officially, it's "combined internal medicine and pediatrics". Really, these docs can care for the newborn to the geriatric patient!

IS THERE ACTUALLY A MED-PEDS RESIDENCY PROGRAM?

Yes! Typically a 4 year program. Some of our events will have faculty/residents that will be able to share their experiences with their residency.

WHAT KINDS OF CAREERS CAN YOU DO AS A MED-PEDS DOC?

Basically anything! Academic and teaching, hospitalist practice, private practice, public/global health, transitional care, research, and more. About 20-25% of residency grads pursue a fellowship (cardiology, infectious disease, etc).
