## Print Directly From Within Your Applications

### How Driver Print works:

1. Setup your computer (it's easy!).  
Get started below!
  2. Print your documents just like printing to a normal printer
  3. After printing, go back to this Web page and the "My Print Jobs" screen and click the button for the printer you want your document printed on, or release your print job at a terminal.
- If the printer you want to use is not listed, use the "My Printers" menu to add a printer to your list.

### 1. Get Started! Select Your Operating System:

## Configuring Driver Print On Windows 10

Please choose how you would like to print:

- Simple Direct (2)** Easy setup, no printer driver to download, but print to a specific print queue
-  [Continue](#)

### Explanation of the choices:

1. With Simple Direct (2) you print using a driver you already have on your computer, and you select a specific print queue to print to. You can create multiple printers on your computer for different print queues in the Pcounter EveryonePrint system.
